

Simple backup solution for industrial PCs

- Easy backup- & recovery-
solution for industrial PCs
- For single partitions or hole
data carriers
- Also usable for NTFS-file system
- No installation necessary
- Software and data carrier image
on a bootable USB-stick
- fast disaster-recovery
- Backup during operation possible

EasyBackup is a fast and easy backup solution for Windows XPe/XP/2000 based industrial PCs. With this software, images of single partitions or whole data carriers can be made directly and without complicated installation to the **EasyBackup** USB-stick.

If Windows should no longer be working correctly, a data carrier image is always handy for this emergency. The industrial PC then can be booted from the **EasyBackup** USB-Stick and with the help of a so-called disaster recovery be restored again. Hence **EasyBackup** increases the availability of industrial PCs and thus also of the controlled machines. Exactly this aim pursues Grossenbacher Systeme with the integration of known industry standards into an innovative automation system **openAutomation**.
